

RAJA V

DEVOPS & BACKEND DEVELOPER

rajavofficialline@gmail.com | +91 9361094344 | linkedin.com/in/raja-v-1a93b51b4/ | Chennai, TN, India

PROFESSIONAL SUMMARY

Backend and DevOps engineer with 2+ years of experience building scalable infrastructure, containerized applications, and CI/CD pipelines. Proficient in Docker, Kubernetes concepts, Linux, and deployment automation. Proven track record optimizing API performance, managing database infrastructure, and implementing infrastructure-as-code practices. Passionate about automation, monitoring, and operational excellence.

TECHNICAL SKILLS

Languages: Python (1+ yrs) | Shell Script | HTML | CSS

Backend & APIs: Django ORM | Django REST Framework (1+ yrs) | Django Channels | Flask | RESTful APIs (1+ yrs) | Fast API

Databases: PostgreSQL (1+ yrs) | MySQL | Raw SQL optimization

AI & Automation: OpenAI API | LLM | Web Scraping (Selenium, BeautifulSoup), ETL | Cron Jobs | Task Scheduling | RAG | N8N | Claude AI | ChatGPT

DevOps & Tools: Docker | Git/GitHub (2 yrs) | Gogs | Postman (2 yrs) | Linux (2 yrs) | Jenkins | Kubernetes | VS Code | Antigravity IDE | Cursor

Cloud Application Deployment & Hosting: Amazon Web Services (AWS EC2) | Oracle Cloud Infrastructure (OCI Compute) | SSH Key Management | Apache Web Server

Other: Technical SEO | Google Search Console | Screaming Frog | Third Party API Integration | Prompt Engineering | AEO | GEO | Agile Methodology | Application Monitoring / Logging

PROFESSIONAL EXPERIENCE

Backend & DevOps Engineer – MarketForesee | Jun 2025 - Present Chennai, India

- Architected and maintained backend microservices serving 20+ concurrent traders with real-time market data integration and optimized API response times (<200ms).
- Engineered Selenium-based web scraping automation (3+) processing 500+ daily data points from 8+ financial sources with 99.5% accuracy, reducing manual data entry by 80%.

- Built and deployed LLM-powered AI chatbot using OpenAI API & LangChain, reducing manual research time by 60% and improving trader decision-making speed by 45%.
- Implemented technical SEO optimizations (sitemap, crawl structure, Core Web Vitals fixes) improving organic visibility by 35% (150 → 202 indexed pages) and page load speed from 3.2s to 1.8s.

Backend Developer – Apex Esther Robotech | July 2024 - Jun 2025

Chennai, India

- Developed and deployed backend services integrating Master Trust Brokerage APIs, processing 500+ daily trading transactions with <2 second API response times and 99.5% system uptime.
- Built RESTful APIs using Django REST Framework and optimized raw SQL queries, reducing API latency by 40% (avg 800ms → 480ms) and improving database performance across financial dashboards.
- Collaborated with frontend team to reduce API payload size by 35%, enhancing user experience across 50+ financial dashboards and improving overall data transmission efficiency.

KEY PROJECTS

Stock Market Screener & Automation Framework | Jul 2024 - Present

- Built real-time stock screener filtering 2000+ NSE companies by technical indicators with <3 second response time using Django REST Framework and PostgreSQL.
- Implemented cron-based automation scripts for market data processing at market close, reducing manual analysis time by 80% for 15+ daily traders.
- Tech Stack: Django REST Framework | PostgreSQL | Python | Cron Automation | RESTful APIs

AI-Powered Weather Chatbot | Personal Project

- Deployed region-specific weather assistant providing real-time forecasts for Tamil Nadu cities with 95%+ accuracy and <2 second response times.
- Tech Stack: Django REST Framework | OpenRouter GPT-4o | OpenWeatherMap API | JWT Authentication | Docker

EDUCATION

B.E. Electronics & Communication Engineering

St. Joseph College of Engineering, Chennai | Graduated: June 2023 | CGPA: 7.39/10

KEY ACHIEVEMENTS

- Integrated 5+ third-party brokerage APIs into production, processing 500+ daily transactions with zero downtime and 99.5% success rate

- Optimized backend database queries reducing API response latency by 40% and achieving 99.5% system uptime for financial platforms
- Built AI-powered automation reducing manual support tickets by 40% and increasing user engagement by 35%
- Implemented technical SEO improvements increasing organic search visibility by 35% and page load speed by 45%
