| Chennai, TN, India

## PROFESSIONAL SUMMARY

Experienced Python Backend Developer with 2 years of hands-on experience building scalable web applications, RESTful APIs, and AI-powered solutions using Django, Flask, PostgreSQL, and SQL. Skilled in backend automation, API integration, web scraping, and LLM-based applications with a strong focus on performance optimization and system reliability. Experienced in Technical SEO, Core Web Vitals optimization, and cloud-ready backend development. Passionate about developing secure, high-performance applications and continuously learning modern backend and AI technologies.

## EDUCATION

**ST.JOSEPHCOLLEGEENGINEERING** | B.E. Electronics and Communication Engineering

Graduation: June2023 | CGPA: 7.39/10

## PROFESSIONAL EXPERIENCE | 2 YEARS

**PRINCE CAPITAL PRIVATE LIMITED | MARKETFORESEE | Backend Developer** | Jul 2025 - Present

*Chennai, India*

Developed and maintained backend modules for MarketForesee stock market analysis platform, serving 20+ concurrent traders with real-time market data and AI-driven insights.

Engineered Selenium-based web scraping scripts (3+) extracting and delivering market insights within 24 hours, processing 500+ daily data points across 8+ financial sources with 99.5% accuracy.

Built LLM-powered chatbot using OpenAI API and LangChain Framework, reducing manual market research time by 60% for traders and improving decision-making speed by 45%.

Implemented Technical SEO improvements (sitemap optimization, crawl structure fixes) improving organic visibility by 35% (150 → 202 indexed pages) and resolving Core Web Vitals issues, improving load speed from 3.2s to 1.8s.

**PRINCE CAPITAL PRIVATE LIMITED | APEX ESTHER ROBOTECH | Backend Developer** | Jul 2024 - Jun 2025

*Chennai, India*

Developed backend logic for financial data flow in web application, integrating Master Trust Brokerage APIs and processing 500+ daily trading transactions with <2 second API response times.

Built and maintained RESTful APIs using Django REST Framework and raw SQL, reducing API response latency by 40% and improving system reliability to 99.5% uptime for 5+ concurrent users.

Collaborated with frontend developers to optimize data handling, reducing payload size by 35% and improving user experience across 50+ financial dashboards.

## TECHNICAL SKILLS

**Languages:** Python (1+ yrs)|HTML | CSS

**Backend & APIs:** DjangoORM | Django REST Framework (1+ yrs) | Django Channels | Flask | RESTful APIs (1+ yrs) | Fast API

**Databases:** PostgreSQL (1+yrs) | MySQL | Raw SQL optimization

**Data Analyst:** PowerBi | Google Looker Studio | ETL | Excel | Data Visualization

**AI & Automation:** OpenAIAPI | LLM | Web Scraping (Selenium, BeautifulSoup) | Cron Jobs | Task Scheduling | RAG | N8N | Claude AI | ChatGPT

**DevOps & Tools:** Docker|Git/GitHub (2 yrs) | Postman (2 yrs) | Linux (2 yrs) | Jenkins | VS Code | Antigravity IDE | Cursor

**Other:** Technical SEO | Google Search Console | Screaming Frog | API Integration | Prompt Engineering | AEO | GEO  
| Agile Methodology | Application Monitoring / Logging

## PROJECTS

### **Stock Market Screener & Automation Framework** | Jul 2024 - Present

Designed real-time stock screener filtering 2000+ NSE listed companies by technical indicators, enabling traders to identify opportunities in <3 seconds. Built using Django REST Framework with PostgreSQL backend. Implemented cron-based automation scripts processing market data at market close, reducing manual analysis time by 80% for 15+ daily traders.

### **AI-Powered Weather Chatbot** | Personal Project

Built region-specific weather assistant providing real-time forecasts for Tamil Nadu cities using OpenRouter GPT-4o LLM and OpenWeatherMap API. Achieved 95%+ accuracy with <2 second response times. Tech: Django REST Framework, OpenRouter GPT-4o, OpenWeatherMap API, JWT Authentication.

## KEY ACHIEVEMENTS

Integrated 5+ third-party brokerage APIs into live trading environment, processing 500+ daily transactions with zero downtime and 99.5% success rate.

Built AI chat module improving user engagement by 35% and reducing manual support tickets by 40% for 20+ concurrent users. Optimized backend database queries reducing API response times by 40% (avg 800ms → 480ms) and improving overall system reliability to 99.5% uptime.

Implemented technical SEO improvements improving organic search visibility by 35% and page load speed by 45% for dynamic financial pages.
